### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Galgano on February 24, 2004.

The application has been amended as follows:

#### ***In The Specification***

The second paragraph of page 7 of the specification has been replaced with the following amended paragraph:

The hydrocyclone liners 48 are surrounded by a fibre-based coalescing structure 30. The coalescing structure is described in more detail below but, put briefly, this has the function of enlarging the droplet size to improve separation performance as described above.

#### ***In The Claims***

Claim 46 has been canceled.

Art Unit: 1723

Claim 45 (currently amended) A method of manufacturing a fluid processing apparatus having a vessel containing a plurality of hydrocyclones and defining an inlet chamber, the vessel having a vessel inlet arranged to feed fluid into the inlet chamber, and the inlet chamber being arranged to receive fluid from the vessel inlet and to pass the fluid to the respective inlets of the hydrocyclones, comprising the ~~step~~ steps of : inserting a mass of coalescing media into the inlet chamber, the media having a substantially predetermined external shape defining at least one elongate liner hole for receiving each respective hydrocyclone liner, ~~and~~ arranging said coalescing media to coalesce relatively small droplets contained in fluid received at the vessel inlet into larger droplets before passing the fluid to each respective hydrocyclone inlet, ~~and~~ subsequently inserting at least one hydrocyclone liner into a respective liner hole and mechanically supporting said coalescing media on said vessel.

### ***Drawings***

The drawings filed on November 14, 2003 are objected to for being clearly informal and having incorrect sheet numbers on two of the three sheets of drawings filed on November 14, 2003. Furthermore, the two sheets of drawings filed on July 24, 2001 which did not need to be corrected, now have incorrect sheet numbers.

In response to this office action, **Formal Drawings with Correct Sheet Numbers are Required.**

Art Unit: 1723
